SEAKEEPER ANNOUNCES MIAMI DEMO DAYS

Come one, come all. Seakeeper is inviting boat owners, builders and members of the media to step aboard the company's 43' Viking Demo Boat and feel the immediate difference internal gyro stabilization makes. Harnessing a gyro's powerful righting force, it's like nothing anyone's ever encountered before with fin-based systems.

Virtually eliminating boat rock and roll and the nauseating side effects these motions create, actively-controlled Seakeeper gyros deliver a powerful righting force for unmatched stability at anchor, zero and low speeds or underway. At the Miami International Boat Show, February 17-21, experience firsthand the product that is revolutionizing onboard comfort. The craft will be located in slip 120 at the Sea Isle Marina.

Taming the sea one boat at a time, Seakeeper is a global leader in internal stabilization technology. Interested parties can contact the company or stop by booth 32/33 in the 2011 Yacht & Brokerage Show. Other vessels with Seakeeper gyros installed in Miami include a Hull 1 of Island Pilot 535, 90' Marlow, Maritimo 550 and Azimut 58, 68, 70 and 72 flybridges, just to name a few. To see the system in action, visit seakeeper.com/downloads_videos.php. To view installation images for various brands, visit seakeeper.com/installation_actualinstallations.php.
