

**FIGHT  
THE FISH  
NOT  
THE ROLL**

Trolling in the trough, backing down on a prize game fish, or just drifting—true fishermen demand the best in stabilization technology. That's why we've engineered the most effective anti-rolling device ever made. Using gyroscopic technology, the Seakeeper™ Gyro System actively controls boat roll, for total comfort and safety. Our proprietary internal system predicts the effect of each wave and compensates before it can be felt, eliminating the need for external fins. Efficient,

quiet and virtually maintenance-free, nothing tames the sea like the Seakeeper™ Gyro.
