

TOTAL STABILITY
AT ZERO SPEED AND
UNDERWAY.

Anchoring in protected waters and cruising the open sea demands the latest in stabilization technology. That's why we engineered the most effective anti-rolling device ever made. Using gyroscopic technology, the Seakeeper™ Gyro System actively controls boat roll, for total comfort. Our entirely internal system predicts the effect of each wave and compensates before it can be felt. Efficient, quiet and virtually maintenance-free, nothing tames the sea like the Seakeeper™ Gyro.
