SEAVEE NOW OFFERS SEAKEEPER MX SERIES GYRO

To complement the high quality and performance of its top-of-the line 430 Express, SeaVee Boats now offers the Seakeeper MX series stabilization gyro as an option. The MX series continues to find success with builders of smaller craft after its launch earlier this year.

Conversations with Seakeeper's East Coast independent rep group ComMar Sales, and a sea trial on an Intrepid 390, piqued SeaVee's interest. "It spoke for itself," said John Caballero, SeaVee Boats marketing director. "We're always looking to raise the bar, to deliver the performance our customers are expecting. Seakeeper adds a lot to that equation, by enhancing comfort onboard and creating a more enjoyable ride."

The SeaVee 430 Express is an extensively customizable boat, designed for fishing and luxury cruising. Power choices include triple or quad outboards, twin inboard diesels, or pod systems. Its three tower options, spacious cockpit, comfortable bridge deck and well-appointed cabin create a high-end, live-aboard fishing boat with the amenities of home. More information is available at www.seaveeboats.com.

Seakeeper's new MX series gyro is based on the same innovative technology as its M8000 and M21000 gyros, but tuned to an individual's application for boats in the 35'-45' range, depending on displacement. It reduces resonant boat roll by more than 80% when a boat is underway, at idle, or at anchor.
