DETAILED INFORMATION

5" TOUCH SCREEN DISPLAY SOFTWARE v7.44.1.147

The 5" Color Display software version 7.44.1.147 released in October 2023 fixes two software issues of the previous version.

An accompanying GCM software update allows the calibration of the angle sensor on Seakeeper 2 through Seakeeper 6 to be performed by the GCM software (like on the current Seakeeper 1). Additionally, the software will allow improved communication with the Seakeeper Service Tool application.
