

CRATE FASTENER UPDATE

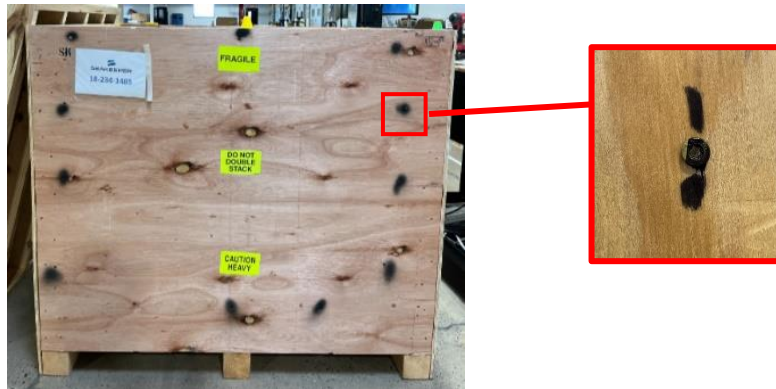

PRODUCTS Seakeeper 1, 2, 3, 4, 4.5, 6, & 9

OVERVIEW

To improve security and availability of component supply, Seakeeper is changing the crate fasteners for Seakeeper 1 – Seakeeper 9 models. The overall crate dimensions will remain the same, with updated fasteners to secure side and top panels. The metal clips that were installed on the edges of the crate will be replaced by #10 x 2" 6-Lobe Flat Head Deck Screw. A Torx T-25 bit is used for installation and removal, as shown in Figures 1 and 2.

*Figure 1: #10 x 2" Screw Head**Figure 2: Torx T-25*

All models that are shipped with screw-secured panels will have black markings to indicate which fasteners need to be removed from unpacking. See Figure 3 for example of the markings.

*Figure 1: Fastener Markings*

To date, only the Seakeeper 2 is shipping with the updated crate assembly. The cut-in Serial numbers for each Seakeeper model are as follows:

- Seakeeper 1: 1-244-0917
- Seakeeper 2: 2-233-1691
- Seakeeper 3: 3-234-4619
- Seakeeper 4 / 4.5: 4-243-0134 / 4.5-243-0203
- Seakeeper 5/6: 6-234-6465
- Seakeeper 9: 9-242-5260

Refer to [Seakeeper Unpacking Instructions](#) for additional details on update crate unpacking process.
